IEG PI NOTICE

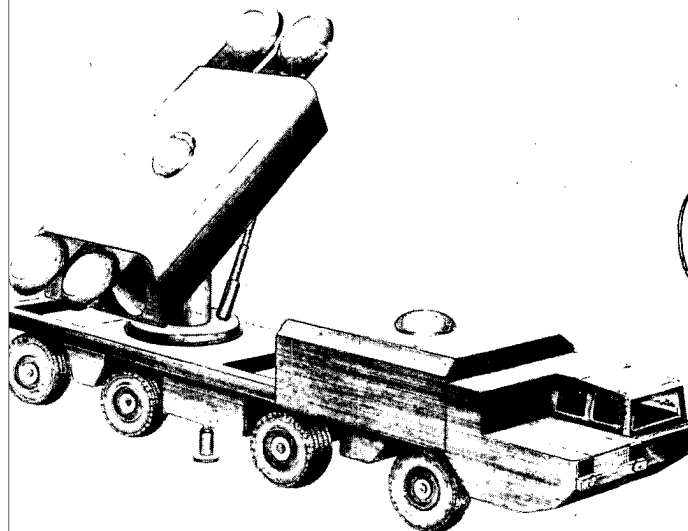

No. 14-82

TITLE/SIGNIFICANCE:

Balaklava-01, Land-Based Mobile Coastal Defense System

COMMENT: The Balaklava-01 is probably a mobile coastal defense platform for the SS-N-2C cruise missile. It consists of a rotatable twin-tube launcher mounted on a MAZ-543SP chassis. At least four of the vehicles have been exported to Split Naval Base Luka Lora since mid-1979. In addition to Yugoslavia, the Soviets have exported the SS-N-2C for at-sea platforms, to India, Cuba, [redacted] and Libya. These countries may also receive the Balaklava-01.
